Title: Conflicts ethical experienced put nurses managers : one scoping review .

Center University of São Paulo School of Nursing
:

Primary Reviewer

Name: Luciane Hupalo da Silva

E-mail: lupalo@outlook.com.br

Question: What are you conflicts ethical experienced by the Nursing managers , in the health services ? ”
and “What are the strategies used in your resolution ?

PCC

P opulation This scoping review will consider you studies and documents that address conflicts ethical ,
: taking in consideration the Concept described by Gracia 2016 where a conflict ethical occurs
when there is one situation in which values or principles morals enter in shock , making
decision making difficult due to values ethical in competition .(GRACIA, 2016)

Concept : The review includes studies involving nursing managers (manager, supervisor, coordinator,
director, superintendent) with professional activity exclusively in the administrative/managerial
dimension

Context : This scoping analysis considers all you health services , without delimitation of the type of
establishment , size , specialty or Geography . A conflict ethical occurs when there is one situation in which
values or principles morals enter in shock , causing decision making it is difficult why different options represent
values ethical in competition .(GRACIA, 2016)
