

# JBI Comprehensive Systematic Review Training Program

## Learn to conduct robust systematic reviews

Join JBI's internationally recognised training program and gain the skills to produce high-quality systematic reviews that inform healthcare guidelines, policy, and practice.

### Why attend?

- Explore the foundations of evidence-based healthcare and systematic reviews
- Understand methodologies for quantitative, qualitative, and text/narrative evidence
- Gain practical skills in literature searching, appraisal, and synthesis
- Apply the JBI approach to develop a systematic review protocol
- Work with JBI experts in a supportive and interactive online environment

### What's included

- Choose from one, three or five-days of online training
- Led by world-class JBI trainers: A/Prof Edoardo Aromataris and Dr Sonia Hines
- Access to all training materials
- 12 months complimentary access to JBI SUMARI
- Certificate of completion (full attendance required)
